

# Smile Design

*Cosmetic solutions for enhancing your smile.*

With so much media coverage on cosmetic dentistry as seen on *Extreme Makeover* and *The Swan*, people are more aware of solutions they may not have been aware of just a few years ago. Some of the solutions may include Zoom!2 in-office whitening, Lumineers (no prep contact lens thin porcelain veneers), and Waterlase gum contouring.

**IMAGINE.** Whiter straight teeth without pain, shots, or drilling in as little as two weeks.

**ZOOM!2 In Office Whitening** Your lifestyle and the aging process can stain and darken your teeth. Many things we do on a regular basis can contribute to stained teeth, such as drinking coffee, tea, cola and red wine or smoking. ZOOM!2 in office whitening is a great first step in enhancing your smile. The complete procedure takes less than an hour. The procedure begins with a preparation period followed by as little as 45 minutes of bleaching. (A cleaning is recommended prior to the actual Zoom! whitening session.)

**LUMINEERS** is the non-invasive approach to permanently whiten, reshape, align and transform your smile without pain, shots or drilling. The complete treatment is accomplished in 2 to 3 visits. The first visit would be to obtain the blue print to your new smile. This is accomplished with cosmetic contouring of the teeth, digital photography to assess the smile line and the relationship of the smile with facial features and impressions. All of this information is sent to the Cerinate Smile Design Studio where only LUMINEERS are crafted. You would return in about two weeks to place your LUMINEERS. This provides a treatment solution for patients who want to improve their smile while conserving natural tooth structure.

**Waterlase Gum Contouring** A “gummy” smile can make teeth look short and unattractive. With the ease and comfort of a laser, gums can be contoured to reveal a more appealing smile. Not only can the laser quickly sculpt excessive and uneven gums, it also

immediately seals the tissue, helping the patient to heal faster and more comfortably. This procedure can be completed in a single office visit.

While cosmetic improvements to your teeth are optional, they should not be viewed as frivolous. Improving your appearance can boost your self-confidence and improve your quality of life. If you tend to hide your mouth or cover your smile because you're embarrassed about the appearance of your teeth, consider a fresh smile as a way of improving yourself!

Every Smile Design is unique to each patient. “One size does not fit all in modern dentistry. Our Smile Design begins with a Smile Design consultation. I truly believe in listening to what each patient wants and then designing a custom treatment plan based on what the patient wants to achieve,” says Dr. Djawdan.

Dr. Djawdan can personally give you a COMPLETELY new smile.

Dr. Djawdan is one of about 4% of dentists in the U.S. that has the advanced training, experience and facility to be able to personally handle every step of a patient's dental goals.

- Reconstructive Dentistry  
*restore worn, broken and missing teeth*
- Smile Design  
*cosmetic solutions with porcelain veneers*
- Dental Implants  
*placement and restorative with one dentist*

*Ask about IV sedation.*

**“It was the most pleasant dental experience I ever had. My dental condition was very poor... and he put a smile on my face!”**

**Dr. Kian Djawdan** DMD, FICOI  
ANNAPOLIS, MD

*No smile is complete without him.*
